

TRODAT - ALWAYS AN ORIGINAL:

Trodat products are thoroughly original: almost 40 years ago the stamp industry was revolutionised by the introduction of the first plastic, self-inking stamp (the Printy 1). To this day around 300 million Printy stamps have been sold worldwide, followed by a stream of innovative products from different product groups.

With all of its products and subsidiaries Trodat offers everything in the world of stamps. This value-added philosophy has made business partners and customers all over the world happy for many years.

Trodat stamp products are innovative and suitable for all applications. In order to offer stamp products that always produce clean and beautiful impressions, the sister company Trotec develops the right technology for stamp producers. The in-house shop solution uTypia can be used by both business and private customers to customise and buy the perfect stamp online, which, since the launch of Trodat Multi Color, can even be multicoloured!

Continuity, trust and innovation are characteristics of the cooperation that exists between Trodat and its sales partners in more than 150 countries worldwide and the same has been true for more than 100 years.

TRODAT BESTSELLERS

CLIMATE-NEUTRAL. AS STANDARD.

After the overwhelming success of the Original Printy 4.0, Trodat has extended its range of products which offer climate neutrality as standard, thus maximising the positive impact on the environment. Since 2013, Trodat has produced more than 70 of its best-selling products with the maximum, technically possible content of recycled plastic to reduce their CO₂ footprint.

In a second step, the remaining, inevitable CO₂ footprint of these products is offset by investing in Gold Standard climate protection projects recommended by the WWF®. As a result, Trodat offers its best-selling products as climate-neutral, as standard!

THE WAY IT WORKS

TAILORMADE

Individual colour and design requirements are a Multi Color Impression specialty. The text and logo fields can be arranged as required. The resulting fields in the ink cartridge are then inked automatically with the selected colours.

PRECISION

The laser cuts the ink cartridge with precision and seals the colour fields at the same time. This prevents the contamination of each of the individual colour fields.

QUALITY

The Multi Color Jet inks each of the individual colour fields with the optimum amount of ink. The result is a set of clean impressions to the usual Trodat level of quality.

ONE COMPUTER - MANY POSSIBILITIES:

The new Trotec Multi Color Jet is operated using the same PC as you already use to control your Trotec laser.

TRIED AND TESTED TECHNOLOGY:

The Trotec Laser Speedy 100, Speedy 300 or Rayjet series form the technological basis for the production of Trodat Multi Color stamps. Special, un-inked ink cartridges - matching precisely the impression design - are cut by laser to match each of the individual colour fields.

NOW NEW AND SIMPLIFIED:

The Multi Color ink cartridge is now inked using the new Trotec Multi Color Jet. Revolutionary: You no longer need to re-tool! All 15 colours are already installed in the Multi Color Jet. So, while your laser is in the process of engraving the textplates, the Multi Color Jet is already busy inking the ink cartridges. This allows you to produce more of the unique Multi Color stamps quicker and in a more cost effective manner.

Numerous surveys of rubber stamp makers were carried out to identify 'What do you expect from the ideal stamp? The valuable results have had a significant impact on the development of the Original Printy 4.0.

1. Simple mounting of text plates thanks to the raised position of the text plate holder

2. Convenient detachable index window which is symmetrical with a large grip

3. Lightweight & compact, which makes it the perfect stamp for when you are on the move

4. Easy to customise! Countless options for your logos and individual prints on the stamp housing

WHAT DO YOUR CUSTOMERS WANT TO BUY?

The Original Printy 4.0 is not just about impressing rubber stamp makers. It also needs to sell well. That's why we also asked users what, in their opinion, makes a good stamp. There were some interesting responses. And we incorporated these ideas when we developed the Original Trodat Printy 4.0.

1. Clean replacement of ink cartridge thanks to special grip zone

2. Exact placement of impressions thanks to the panoramic viewing window

3. Unbelievably small & light, perfect when you are on the move

TRODAT LASER RUBBER

Is there such a thing as a laser rubber that suits every application? Probably not. That's why Trodat has developed a range of products that meet all requirements. Which text plate rubber is right for you depends entirely on your business and on the kind of orders you have. The choice is yours!

With Trodat laser rubbers you choose the best engraving results and highest productivity.

ALL GOOD THINGS COME...

The results are so convincing because coordinated research work is carried out into all three segments: stamp components, laser engraving equipment and text plate materials. It is the combination of these three well-coordinated components that creates the unique features that allow Trodat customers to clearly stand out from the competition.

ABSOLUTELY NON-HAZARDOUS

Trodat laser rubbers are completely harmless with regard to occupational health and safety. During the entire manufacturing process, levels fall significantly below the stringent European limits on maximum workplace concentration (MAC).

TRODAT ULTIMARK

Stamping made easy: with pre-inked stamps, the stamp's ink is already integrated in the text plate, so no separate ink pad is required. You get thousands of precise and clean imprints, and re-inking is easy.

In addition, pre-inked stamps are very popular for large imprints in particular because the stamp is relatively small despite the large imprint area. Now in a new design!

This makes the process of ordering customised products simpler, with all parties involved saving time and money. In addition shop-in-shop integrations are increasingly in demand. This of course, is possible. uTypia can be integrated so that the user will be guided to uTypia for just the customisation of a product (e.g., stamp layout).

UTYPIA PAGE

uTypia Page is the first step toward creating a professional online presence for your company. This website solution has many modern design features developed by web design specialists. It also has the ideal technical prerequisites for search engine optimisation. The content management system is easy to use and helps you to keep all information current. uTypia Shops and uTypia Page can be perfectly combined with one another.
